

Happy New Year from BINGO Industries!

We hope you had a very happy festive break. It's important to keep our community up to date with the latest information about the project, so here is the latest news on how things are progressing at Patons Lane RRC.

Initial site development started in May 2018 and is now well underway. We recently completed a successful dewatering project to remove excess storm water that had accumulated in the old quarry pit. The recycling facility will be completed in the next three to six months. Bund walls will continue to be adjusted as per the plan and landscapers will also be onsite revegetating the completed walls. Operations are expected to commence in mid 2019.

Road Upgrade - Luddenham Road

Road upgrades to widen Luddenham Road will commence in mid January 2019. Works are expected to continue for approximately twelve (12) weeks. The upgrade to the road measures 480 metres.

One half of the road will remain open at all times. A traffic control system will also be in place for the duration of the road work.

Community Liaison Committee

The Patons Lane RRC **Community Liaison Committee (CLC)**, comprising of community and local council and representatives of the company, met in December 2018 to discuss progress of the facility's development. Members of the CLC also enjoyed a tour of the site. Minutes of all CLC meetings can be found on the project website. Every meeting is chaired by an Independent Chair, Peter Gordon.

What is a Resource Recovery Centre?

As Sydney's population continues to grow, the need for effective recycling increases. A resource recovery centre collects, recovers and reprocesses waste and materials into valuable resources. This process provides a better, more sustainable future for the environment we live in, by reducing waste and its impacts on our society.

The BINGO Industries facility at Patons Lane will only process commercial waste. It is not for domestic waste and it will not accept any hazardous or putrescible (food) waste.

About BINGO Industries

BINGO Industries is a proudly Australian owned and operated waste management and recycling company with 14 established operations, predominantly in New South Wales and Victoria.

BINGO provides end-to-end environmental and waste management solutions across the waste management supply chain. Our integrated collection and post-collection activities are focused on the collection, separation, processing and recycling of Building and Demolition and Commercial and Industrial waste. We strive for continual innovation and development of technology, services and practices as part of our commitment to developing leading waste management and environmental solutions. BINGO continually transforms the waste industry, helping business and the community to achieve their sustainability goals.

BINGO's management and compliance systems are accredited to international standards and include a comprehensive internal and external auditing program. Our focus is on excellence.

Stay in touch

We are on track to finish the recycling facility and commence operations in July 2019. We encourage the community to stay in touch to get the latest developments. Visit our website and sign up to receive regular digital updates via the Patons Lane Community Newsletter and join the Facebook group. If you have any questions or wish to provide feedback please don't hesitate to contact us.

To receive regular projects updates please register your interest on our website or join us on Facebook.
